Machine Learning Assignment 3

1) D
2) D
3) C
4) B
5) D
6) C
7) D
8) A
9) A
10)
11) A
12) B
13) Clustering helps in understanding the natural grouping in a dataset. It is used to group same or similar data together to simplify the processing of large datasets.

14) Clustering performance can be improved by using feature analysis and extraction techniques.
